

Work Bench with T-slotted Steel Table Top

We offer custom designed T-slotted tables in any size and working height. The table in the picture above is 6' x 2' x 2.5" made of steel and fine milled on the top according to DIN 876 flatness requirements. It has two T-slots and custom mounting holes.

The frame is a steel weldment, approx. 33" high and sized according to the plate weight and payload. It also has height adjustable rubber dampers for limited vibration isolation.

The frame can be painted per customer specification or comes in a standard gray.

Please contact us for further information. We are happy to send you a quote.
